Start / Finish

HISENS LIGHT

Entry-level photocell

Rankings Centre

HILINK

10mW or 500mW radio transmission system

ATPRO

Professional Portable Chronometer

RESULTS BOARD

Scoreboard showing the time, including penalties

In detail

These events are disciplines in which agility, precision and speed are essential. Unlike horse racing, here the chronometer must account for winding courses and technical penalties.

Timing is carried out using a HiSens radio-controlled photocell positioned on the start/finish line and an RTPro chronometer, with a specific programme that allows penalties to be applied during the race, displaying the time including penalties on the MicroTAB scoreboard.
